

# Vaporite®

## Instructions for Twister

- 1) Press and hold the power button for two seconds. The unit will now turn on. At this point you will see blue lights blinking.
- 2) Now set the desired temperature using up and down button. Each blue light indicates a level of temperature.
  1. 330°F - 350°F
  2. 351°F - 370°F
  3. 371°F - 390°F
  4. 391°F - 410°F
  5. 411°F - 430°F
- 3) Once you select the desired temperature, a red light will turn on indicating that the unit is heating up. Once it reaches the desired temperature then a green light will turn on and the red light will turn off, which indicates that the unit is now ready to use.
- 4) Now, unscrew the mouth piece from top and load the bowl with well grinded tobacco / herbal blends. Then screw the mouth piece back on and let it sit for a few seconds and then inhale. If the vapor is very thick or a little harsh then please lower the temperature one level.

### Important

- The unit will go on standby mode if left idle for ten minutes.
- It can be used while on charging. When on charging, you will see a orange light when the power button is pressed. The orange light will turn off when the unit is fully charged.
- When orange and blue lights start blinking rapidly, it indicates that the battery needs to be charged.
- In order to completely charge (100%) your unit, leave the unit plugged in for twenty minutes after the orange light has turned off. A full battery will give up to ninety minutes of vaping.
- When you are not using the unit please turn it off. It will conserve your tobacco / herbal blends as well as battery.
- The reset button is to change current settings to default settings.
